# Rohit Verma

Manager Global Network Operations

Hyderabad, Telangana, India

## Summary

I am focused, result-oriented, and take full ownership of my responsibilities. I lead a team of over 10 engineers managing operations across Internet, Backbone, and Optical networks. My experience includes collaborating with automation teams to improve Internet route control and implementing advanced routing strategies for global network optimization. I also oversee daily Internet Edge operations, ensuring comprehensive monitoring and rapid incident response.

## Experience

Oracle

Manager - Global Network Operations

June 2024 - Present (2 years 1 month)

Hyderabad, Telangana, India

Lead a team of 10+ engineers in managing operations for diverse circuit types, including Internet, Backbone, and Optical networks

Providence India

Principal Engineer

February 2024 - May 2024 (4 months)

Hyderabad, Telangana, India

Integrate needs assessments, cost estimates, project planning, and implementation strategies for the deployment, upgrade, operation, and maintenance of networks and related products.

Accountable for project results, timely delivery, and effective management of scope, schedule, budget, benefits realization, and stakeholder satisfaction.

AT&T

Technical Specialist

December 2010 - January 2024 (13 years 2 months)

Key Initiative on Network deployment measurement methods for IBM wired & Wireless network. Manage Development and performance analysis of IP network traffic data to characterize customer usage of IP network services/ resources and identify key emerging applications and trends in support of IP Core initiatives & Content Distribution investments.

As part of India Technology Infrastructure design team, develop strategy; identify technologies and design resilient, competitive and recoverable core network solutions. Engaging directly with business to ensure that requirements are understood, usage patterns are analyzed, solutions are tested and technology is leveraged to enhance communications, collaboration and productivity firm wide

## The Search House

### Network Specialist

May 2009 - November 2010 (1 year 7 months)

new-Delhi

Search House - AT & T

Project: IBM

In October 2006, AT&T became the first global telecoms operator in India to secure — through the AT&T India joint venture — national long distance and international long distance licenses in India. AT&T India began offering commercial services in early 2007 with the capability of providing AT&T's global customers who are operating in India with the same standard of communications services that they enjoy from AT&T elsewhere in the world. As a part of NDD (Network Design and Deployment) team I was involved in various activities that included being Technical Solution Architect as well. My responsibilities included:

As Network Engineer

Managing around 2500 devices across India that included Cisco Switches, Access points. Cisco Switches: Cisco 6509-E SUP 720, Cisco 4506 E, Cisco 3560, Cisco 3750, Cisco AP 1131 AG, and Cisco AP 1242AG etc.

Successfully leading a project for all over India implementation of IPS across multiple sites on strict deadlines.

At present involved in changing configuration of infrastructure devices across India as per AT & T standard.

Driving a project for all over India implementation of user access switches across India, the total device count is more than 20.

Preparing network design and documentation.

Carrying out observation of switches configuration, for NDD standard.

Carrying out implementation of new sites across India.

As a Technical Solution Architect

To provide solution on the raised CMF (Change management form) by IBM.

To work closely with IBM and try to understand their requirement.

Solution included, providing configuration, network design.

To provide BOM (Bill of material) and cost of implementation to the IBM Sales team.

CSS Corp

Network Engineer

December 2008 - January 2009 (2 months)

Project: Alcatel-Lucent TAC

CSS is a global provider of end-to-end IT solutions to enterprises, consumers & technology providers. CSS manages technology, infrastructure, platforms and applications for Fortune 2000 companies, and provides 24x7 support solutions for leading enterprise, consumer and technology vendors.

Headquartered in San Jose, CA, CSS is backed by leading financial institutions including Goldman Sachs, Sierra Ventures.

As a team member I was involved in:

Responsible for providing L1/L2 Technical support for data products.

Troubleshooting Alcatel Switches: Omni Switch 6000/7000/8000/9000 series.

Recreating reported technical issues in the LAB.

Reporting known issues/Bugs to engineering team for possible fix.

Preparing technical tips for providing configuration assistance to customer.

Maintaining SLA as per the severity of the service request.
